

MULTI-LAYERED WOOD SLATTED

Height : 15 cm or 22 cm

Finish : Sewn

Support : Firm

+

AN IDEAL DUO FOR PERFECT SLEEP :

The bed frame is an integral part of your bedding. It makes up a third of the support and therefore the comfort, while you are sleeping. We recommend that you change your bed frame at the same time as your mattress because the quality of a very good mattress placed on a worn bed frame will deteriorate much more quickly.

- High durability: The bed frame is made of solid wood, a natural and quality material.
- Hygienic, solid and stable bedding thanks to the positioning of the slats (fixed on beams) and the covering made of Tript'Air® 3D ticking.

PRODUCT HIGHLIGHTS

The multi-layered wood slatted bed frame strengthens and stabilises the bedding.

+

FINISHES :

The Simmons multi-layered wood slatted bed frame is available in two versions: ticking or decorative. It is compatible with all Simmons mattresses.

- 13 or 14 multi-layered wood slats, 98 mm in width, with 1 or 2 longitudinal beams
- Box made of premium solid fir
- Top made of Tript'Air® ticking
- Padded side panels
- Base canvas
- Drilled corner brackets for threaded rod feet, diameter 8 mm

Sewn Finish
