

POCKET-COIL SLATTED BED FRAME

Height : 15 cm

Finish : Sewn

Support : Medium Firm

+

AN IDEAL DUO FOR PERFECT SLEEP :

The bed frame is an integral part of your bedding. It makes up a third of the support and therefore the comfort, while you are sleeping.

We recommend that you change your bed frame at the same time as your mattress because the quality of a very good mattress placed on a worn bed frame will deteriorate much more quickly.

The combination of pocket springs with slats provides balanced comfort and freedom of movement while sleeping.

- **High durability** : The bed frame is made of solid wood, a natural and quality material.
- **Hygienic, solid and stable bedding** thanks to the positioning of the slats (fixed on beams) and the covering made of Tript'Air® 3D ticking..

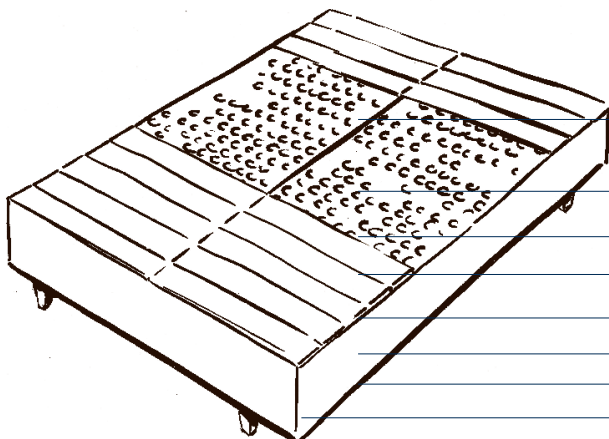

+

FINISHES :

The Simmons pocket-coil slatted bed frame is available in two versions: ticking or decorated. It is compatible with all Simmons mattresses.
